TIGA

Official Genuine Parts

This wide range of STIGA Spare Parts, attachments and accessories is built on the long experience in designing and manufacturing of garden machinery and it is suitable for all STIGA products.

Developed together with the machines, these accessories enable you to always get **high performances in total safety**.

Strict tests, **careful checks** during all the Processes, **high quality of raw material** and **perfect applicability** on the machines are the fundamental elements which make STIGA Spare Parts and Accessories different from other general after-market products.

Only original STIGA Spare Parts and Accessories are tested and approved by the home-factory ensuring total safety during use, especially for potentially dangerous parts, such as blades.

For these reasons, during all the maintenance activities, it is fundamental to verify that the broken or damaged part is substituted only by original STIGA Spare Parts and Accessories.

All the technical and fitting information can be easily found in the present catalogue.

STIGA Spare Parts and Accessories:
Guaranteed quality and safety.

Robot Mowers

MAINTENANCE

STIGA offers a waterproof **cover**, which allows Protection of the recharging base in total safety if it has to stay outdoors. It can be adapted to the robot itself. The **charging base** cover, instead, Protects the robot from all atmospheric agents, like sun and rain, It's easy to assemble/ disassemble in case of ordinary maintenance or cleaning operations. Designed to join functionality (the correct fresh air flow is assured by the front and side windows, while its shape allows the easy access to the keypad without removing the robot from charge) and aesthetic (an unmistakable STIGA "sign" will stuck in your garden for all the cutting season).

WHEELS

Autoclip machines are built to mow grass effectively on flat and sloping landscapes. STIGA offer a wide range of accessory wheels to increase the already remarkable stability of their products. The machine is thus able to maintain its direction, maximizing the power efficiency of its battery. When equipped, the machine has extra grip, climbing smoothly in all conditions, minimizing risk to the lawn.

BLADES

STIGA blades are made of robust steel, ensuring a long-lasting, very stable robot cutting performance; thanks to this, grass will remain healthy after repeated mowing. Contrary to other manufacturers' technical solutions, STIGA's robustness and dimension give the robot extra solidity in case of impact with small objects (sticks or pebbles) allowing impact to occur without damage.
More than just ensuring savings in financial outlay, this feature also adds to the safety of the product no dangerous metal-cutting shards and splinters will remain as debris on the lawn. Further, flat blades are designed with 8 sharpened cuttings, allowing for usage on both sides (inverting the wheels upside down). Their circular, flat shape, guarantee easier sharpening.

LITHIUM BATTERIES AND CHARGERS

STIGA guarantees original high quality accessories such as lithium batteries. This type of battery lasts 2-3 times longer than rechargeable batteries (Ni-Cd and Ni-Mh). It's light and doesn't suffer from the so-called "memory effect", has slow self-discharge if not used (about 5% per month) and discharges very slowly. Kit 1126-9174-02 has been created to power the 720S machines.
The kit, composed by two 7.5 Ah batteries, one battery charger and the wiring, lets to cut a garden of 6.000 m^2.

INSTALLATION

To ensure best performance, Autoclip robot models requiring installation should be subject to a careful installation procedure.
To this end STIGA provides the best installation materials and solution. Autoclip **cable** is engineered to support an extremely strong sinusoidal signal - the strongest in the market for its category. During normal installation, if a joint on the cable is needed, STIGA now offers the **connectors** available in packaging of 10 pcs. **Nails** have been improved: made in a more robust material and thanks to a special thread guarantee a superior grip to the ground.

Chainsaws

CHAINS

E1MC - BL

The E1MC - BL is small and light-weight, making it easy to use and maneuver. It has small radius working corners for excellent performance and it is easy to maintain.

Saw size	**Up to 38 cc**
Bar lengths	**Up to 16" (40 cm)**
Features	**Smooth cutting with reduced kickback features**

Micro-Chisel

N1C

N1C is ideal for Property owner or Professionals using light-weight chainsaws, who prefer low kickback. Bumper drive link paired with depth gauge design offers reduced kickback with strong performance and low-vibration.

Saw size	**Up to 40 cc**
Bar lengths	**Up to 18" (45 cm)**
Features	**Smooth cutting with reduced kickback features**

Chamfer-Chisel

K1NK - BL

K1NK - BL is ideal for arborists and Property owners seeking top performance. The narrow kerf cutting systems is more efficient, needing less power from the saw than standard cutting systems. Low-vibration, excellent performance and easy maintenance.

Saw size	**37-45 cc**
Bar lengths	**13"-18" (32-45 cm)**
Features	**Faster, sharper and easier to maintain; requires less power for faster cuts**

Micro-Chisel

K2C - BL

Ideal choice for regular users of saws such as Property owners and landscapers. Low-vibration, excellent performance and easy maintenance. Low kickback design.

Saw size	**40-62 cc**
Bar lengths	**13"-20" (32-50 cm)**
Features	**Smooth cutting with reduced kickback features**

Micro-Chisel

K2LX - BL

Upgrated version: 10% more performing. An ideal chain for professional woodcutters who use .325" pitch saws. Low-vibration, full chisel cutters offer top performance. Offset depth gauges prevent cutters from driving into the sidewall of the cut, offering a smoother cut.

Saw size	**40-62 cc**
Bar lengths	**13"-20" (32-50 cm)**
Features	**Maximum speed with precision cutting for high performance saws**

Chisel

A2EP - BL

An ideal choice for Professional users who cut in a variety of conditions. Easy to maintain. Low-vibration, semi-chisel cutter designs work fast. This design is typically more tolerant of sharpening errors than chisel cutters.

Saw size	**> 60 cc**
Bar lengths	**16"-36" (40-90 cm)**
Features	**Multi-purpose use, stays sharp longer and is easier to file**

Semi-Chisel

A2LM - BL

Ideal chain for Professional woodcutters. Low vibration, top performance.

Saw size	**> 60 cc**
Bar lengths	**16"-36" (40-90 cm)**
Features	**Maximum speed with precision cutting for high performance saws**

Chisel

Bump&Work

Double line head.
Features:

- New design, handy and sturdy
- Higher flexibility spring for better line consumption control
- Extremely balanced at any rmp range
- Anti line-entangling design

TRIMMER LINES

Due to the very high quality of raw materials and extrusion technology, STIGA Trimmer lines offers considerable advantages:

- Made from high quality materials with high durability
- Excellent abrasion resistance
- A line that lasts longer
- Less breakage at the eyelet
- A cleaner cut

SP Square

A 15 meter reel of square section line with a 2.4 mm diameter for use with STIGA hedge trimmers and brushcutters. This particular shape of line creates sharper edges that will guarantee a precise and quick cut of the grass.

Round Tiger Section

Professional quality, co-extruded Trimmer lines for any type of use.
Made with a unique blend of materials for superior cutting performance.

A more efficient cut:

- less breakage at the eyelet
- faster
- for grass and weeds
- flexible for better cutting around stony areas, fences, kerbs and sidewalks.

Undulated Section

SP66® is the only trimmer line that has been specifically developed for battery machines: giving longer battery run time! SP66® has a patented raw material blend which is very hard wearing and has a higher melting point that eliminates welding in the head. The unique shaping Process provides an aerodynamic Profile with less air resistance, less vibrations and reduced decibel emissions. These energy saving features give a longer battery run time!

Excellent aerodynamic Properties:

- Longer battery run time
- A faster cut than traditional lines
- Less effort required during cutting
- Reduced decibel emission

Hard wearing:

- Superior resistance to abrasion and eyelet wear
- Very stable and durable

Usage:

- Battery machines
- All types of use

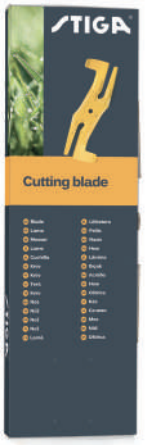
Lawn Mowers

BLADES

A complete range of blades for different cutting procedure, always in total safety. All STIGA blades are tested and can be approved only if they stand the impact test to guarantee user's safety even in case of accidental clashes against stones, rocks or other hidden obstacles. Mulching blades mince grass into small particles, that remain under the bodywork, becoming soil for the lawn.
The special drawing of the collecting blade has a fin on both tips to facilitate cut grass down flow, through the exhaust manifold, up to the grass catcher.

PACKAGING
(for < 40 cm blades)
Dimensions:
6.5x40x3.2 cm

PACKAGING
(for > 40 cm blades)
Dimensions:
12x53x3.7 cm



PACKAGING
(for double-layered blades)
Dimensions:
16x54.5x3.5 cm

Types of blades

STANDARD BLADE

Linear and sharp design exclusively thought to guarantee a perfect cut and to optimize the grass collection in the rear discharge mode.

WINGED BLADES

They are designed with a special fin on both tips to facilitate cut grass down flow, through the exhaust manifold, up to the grass catcher.

COMBI BLADES

This versatile design ombines the waved shape of the mulching blades with the long fins of the winged blades, allowing this blade to be used either in rear discharge or mulching mode.

MULCHING BLADES

Waved design that allows the blade to mince grass into small particles, that remain under the bodywork, becoming soil for the lawn.

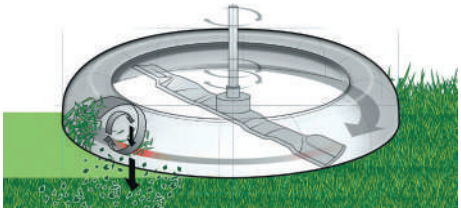
DOUBLE-LAYERED BLADES

Double-edged design that represents the evolution of the mulching blades.

This patent pending design doubles mowing efficiency cutting the grass in two different times for power saving and optimizes grass collection for the perfect cut.

Multiclip Technology

The STIGA Multiclip system cuts and recuts the grass into tiny pieces that simply wilt away, returning valuable nutrients to the soil to encourage beautiful green growth.



XC System Technology

Double-layered blade specifically shaped to perform a double cut and make grass clippings smaller.
Special deck design imProving the airflow and the overall collecting performances.
Extrashield Protecting mechanical parts against dirt and bumps.

BLADE HOLDERS

Together with the blade, the blade holder is one of the main safety components both for tractors and walk behinds machines. In case of clashes with obstacles, it's fundamental that both blade and blade holder remain complete, to avoid sharp parts hit the users or people around. For this reason, STIGA blade holders are tested with destructive and entirety tests to maintain complete safety.

BELTS

All STIGA belts are developed following measurements and tolerances which let the belt itself to adapt perfectly to the machine.
Made with a specific length, different for each machine, STIGA belts guarantees the correct operations of all the parts, avoiding any possibility of damage or breaking that can occur using non original belt.

LITHIUM BATTERIES AND CHARGERS

As to battery lawnmowers, apart from the batteries supplied with the machine (2.6 and 3.0 Ah) a more powerful battery is available (4.4 Ah) allowing mowing for longer periods of time. All STIGA batteries are made of lithium. The quick battery charger allows cutting down on recharging time. In fact, thanks to it, it is possible to recharge the battery in 1 hour rather than 3 hours as with traditional battery charger.

MULCHING KIT

The Mulching kit chops the grass cuttings finely and leaves them on the lawn, instead of collecting them in the grass catcher.

MAINTENANCE

The STIGA scraper is ideal to get rid of the grass and soil residues left on the cutting tray quickly and safely, since it guarantees super performance over time. As for lawnmowers already fitted with a hose attachment, we recommend residues are removed with the scraper before using the water jet. Thanks to the protective cover in strong waterproof nylon and available in two sizes, when not in use the machine can be left away from dust, dirt and the weather.

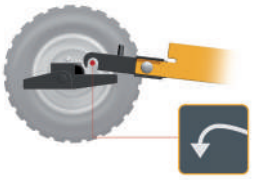
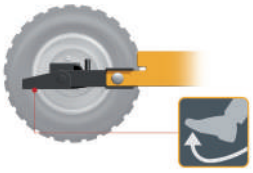
RAC Quick Connect

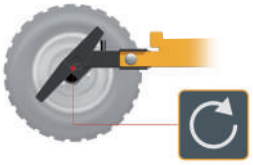
The RAC quick connection allows to quickly switch Accessories and attachments on a front mower. No tools are needed, the operation takes less than one minute.
RAC is available as standard on the STIGA Park models and as an option on the STIGA Villa models.



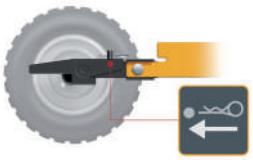
Secure the accessory hook



Move the lever arm up using your foot



Lock the arm in the correct position



Secure the lock using a split pin

Mulching kit (plug and blades)

Multi-Connect System

The Multi-connect system enables to switch between a wide choice of implements for spring, fall, and winter use. Granting maximum versatility, it is also very intuitive and easy: switching Accessories and attachments is quick and requires no tools. Proper kit and attachments can be chosen according to the model (2WD or 4WD traction), to enjoy taking care of the garden all year round.

+

PTO KIT
Attached to the tractor it can be left in position even without using the implements itself.

Engine Parts

FILTERS

The aim of the filter is filtering the air that is channelled from the outside to the combustion chamber, getting rid of all impurities.
A non-perfectly clean air filter can affect the performance and life of the engine itself. It is therefore vital to check it and replace it when dirty. The STIGA range includes filters suitable for each type of machine.

SPARK PLUGS

The STIGA spark plugs are suitable for all 2 and 4 stroke engines from the STIGA machines. In particular the K7RTC spark plug has been designed specifically for the 100 cc engine fitted on all lawnmowers and tillers. These spark plugs reduce the formation of combustion deposits therefore reducing the risk of faulty ignition and internal faults. They have a long life and are highly resistant to vibrations.

Lubricants and cans

CHAIN OIL

To work Properly, chainsaw chains and bars must be lubricated. The chain oil avoids excessive friction between the bar and the chain that might cause wear and tear as well as damages.

MINERAL CHAIN OIL
High viscosity, extremely tacky lubricant which has been developed for lubrication of all types of pressure fed chainsaws.

FAST BIODEGRADABLE CHAIN OIL
Environmentally aware chainsaw oil based on harvestable raw materials. Such a product makes a significant contribution to reducing ecological pollution. According to the CEC L-33-A-93 test method STIGA Biodegradable Chain Oil is biodegraded more than 90% within 21 days and it is not water-soluble. It is rapidly biodegraded in the biologically active upper reaches of the soil.

2 STROKE OIL

In the 2 stroke engine the fuel air mixture is burned and the exhaust gases cleared out on the down stroke and the cylinder is recharged and the working fluid compressed during the upstroke.
STIGA 2 stroke oils has a higher certification in comparison to the majority of lubricants in the market. It is certified JASO FD that means a superior quality and a better oiling. A superior quality means the engine parts have a better lubrication, the spark plug hardly get dirty, less leftovers in the cylinder, so low smoke and a better engine performance. Less poisoning as a consequence and finally catalyser will not get damaged. See the graphic.

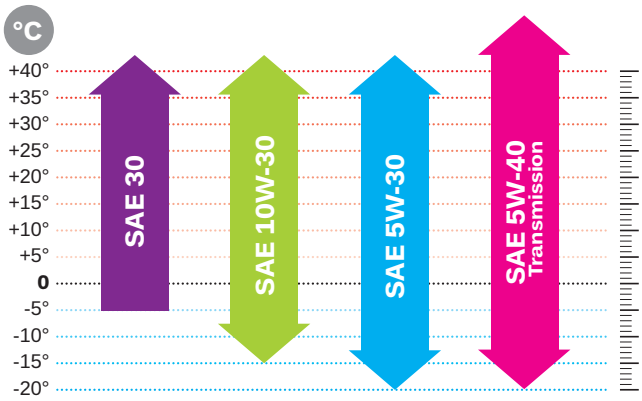
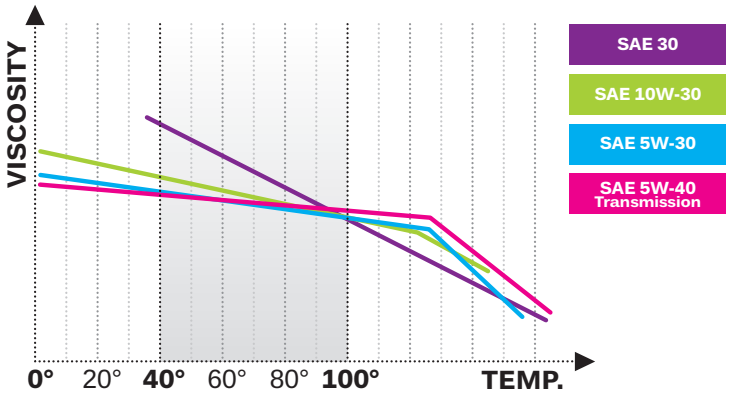
4 STROKE OILS AND TRANSMISSION OIL



Temperature performance



Viscosity performance

Whether you're looking for better performance or improved reliability in your engine, it's essential that you get your oil right.
Using the correct oil keeps your engine running smoothly. Primarily, oil stops the metal surfaces in your engine from grinding together and wearing, by creating a separating oil film between them.

The oil also disperses heat and reduces wear, Protecting the engine. On top of this, good oil prevents dirt build-up and deposits by keeping them in suspension. Motor oil even Protects against sludge and fights oxidation, keeping the oil fresh and minimising acids which can cause corrosion. In short, oil matters.

SAE 30 is superb for use from 0 °C ambient temperature, the specifications API SL/CF mean that it is suitable for both gasoline and diesel engines with and without turbo charger.

SAE 10W-30 designates a multigrade-oil. "10W" stays for the viscosity of the oil at cold temperature and the number 30 indicates the viscosity at 100 °C.

SAE 5W-30 designates a multigrade-oil. "5W" stays for the viscosity of the oil at cold temperature and the number 30 indicates the viscosity at 100 °C.

TRANSMISSION OIL

The transmission fluid plays a very important role in the whole transmission system. It serves as a hydraulic element of the transmission system, keeping it clean and well lubricated, and keeps the temperature at the right level. With so many important components inside a transmission it is very important to stay on top of this service. Once transmission fluid breaks down it allows moving internal parts of the transmission to fatigue.

CANS

The yellow fuel can is certified for land and sea transport. The dispenser allows the liquid to run out continuously without any over-flowing. The cap has special seals suitable to be in contact with the various types of hydrocarbons.
The Combican canister holds 5 litres of petrol and 2 litres of oil. It is fitted with an effective anti-overflow device so that filling is stopped automatically when the tank is full. The 2 cans can be separated.

PROGRAMMING CABLE

The STIGA diagnostic tool can be used on Park Pro 340 IX, Park Pro 540 IX and Park Pro 740 IOX. Once connected to the electronic card, the tool allows the following operations:

1. Software updates of the electronic cards
2. Diagnostic section to perform display check, keyboard check and seat switch check
3. Access to recorded data on the electronic card
   (hours of use, number of engine starts, number of battery warnings, max engine RPM reached, hours of use on slopes over 10°)
4. Transfer of recorded data from an electronic card to another (useful in case of electronic card replacement)
